Center hole grinding machine

ZAMAG

ZSM-M6-1000-SP150

with precision chuck \varnothing 150mm

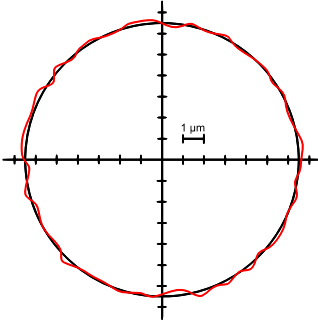

swiss technology

One machine - Many advantages

Highest precision:

The machine achieves a concentricity accuracy of 0.001mm

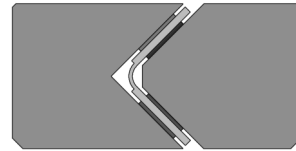

You have the workpiece - We have the suitable machine:

Thanks to a lot of equipment possibilities the machine can be adapted exactly to your requirements and workpieces

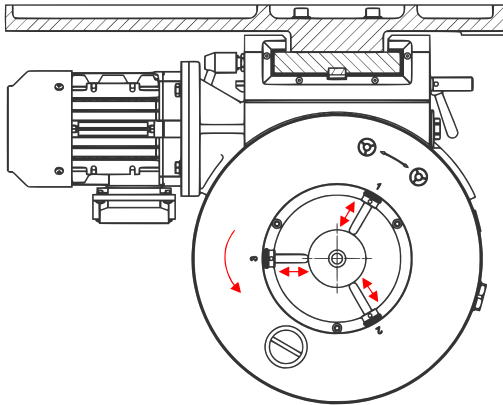

Swiss quality:

- Stable cast iron machine base (stress-free)
- Carriage with roller guides

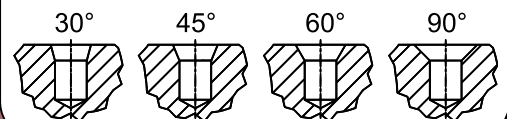

Clamping of the workpieces in the chuck:

With the help of the three adjustable quills even workpieces with an inaccurate surface can be clamped and aligned

Swivelling grinding head:

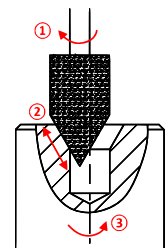

With the swivelling head the grinding angle can be adjusted between 0° and 90°

With a lot of experience to the optimal result:

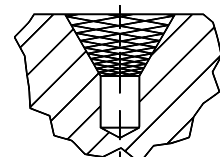

Grinding principle:

1. rotary movement of the grinding wheel
2. stroke movement of the grinding wheel
3. rotating workpiece

Result:

A cross hatch pattern with oil pockets that provides optimum oil retention in the center holes
